Subject: RE: FOIA Request
Attachments: FOIA E1251 1348 & 1149 SR 18499824, 18950588, 18963708.pdf

Sir,

Submitting below, recommend all be reviewed by appropriate authority for CUI prior to release. I have attached a record of disposition for one of the serial numbers.

Per telecon, it does not appear to have much information pre-dating the cutover to GCSS-MC as dates loaded were in line with proposed fielding. It is likely LOGCOM/MCLB Albany will have additional information regarding sale back to commercial side. All information below is pulled from the Global Combat Support System – Marine Corps (GCSS-MC). GCSS-MC does allow us to see all transactions and transfers between units, and all maintenance service requests. There is no history of issue to a specific individual retained in any record management program and all records of this nature and at this time are immediately destroyed per the TM 4700-15/1H; Ground Equipment Forms and Records manual.

Per a review of relevant technical publications, the Fielding Plan (FP) 09795C, dated March 2013, states the proposed date of fielding was around the third week of April 2013. This would have been after the initial receipt of assets from manufacturer, government acceptance testing at Albany, GA, and then subsequent fielding to regional supply issue points.

Serial Number

02679EGA ; This serial was gained to 2d Marine Raider Bn property records 16 April 2013. It appears to have been shipped and transferred to MCLB Albany, GA 30 Sep 2016. There is no remarkable record of major repairs conducted.

02680EGA; This serial was gained to 2d Marine Raider Bn property records 16 April 2013. It appears to have been shipped and transferred to MCLB Albany, GA 30 Sep 2016. There is maintenance history showing a "Predeployment LTI" in May 2015. There is a corrective maintenance action performed in April 2015 to replace the (1)/ 016170443/ SPRING, FIRING PIN PLUNGER (BLOCK SAFETY) (1)/ 016170445/ PLUNGER, FIRING PIN (BLOCK SAFETY) (1)/ 016170462/ LEVER, PLUNGER (BLOCK SAFETY)

02437EGA; This serial was gained to 2d Marine Raider Bn property records 16 April 2013. It appears to have been deployed ISO OEF in May of 2015. It appears to have been shipped and transferred to MCLB Albany, GA 6 August 2015 on a request for return to stores as excess. There is no remarkable record of major repairs conducted.

04866EGA; No record found.

01099EGA; This serial was gained to 2d Marine Raider Support Battalion property records 19 April 2013. It appears to have been shipped and transferred to MCLB Albany, GA 14 August 2015. There is no remarkable record of major repairs conducted. There is no record of military "limited demilitarization" as indicated by requester. If there was a request for limited demilitarization there would be a maintenance request, but there was none found in the system.
